Bing Chat Enterprise

The screenshot shows the Bing Chat Enterprise interface. At the top, there is a navigation bar with the Microsoft Bing logo, a search icon labeled 'SEARCH', and a chat icon labeled 'CHAT'. Below the navigation bar is the Bing Chat logo, which consists of a blue speech bubble with a white 'b' inside. The main heading reads 'Bing Chat Enterprise' in a large, bold, purple font, followed by a shield icon with a checkmark. Below the heading is the text 'AI-powered chat for work'. A disclaimer states: 'Bing is powered by AI, so surprises and mistakes are possible. Please share feedback so we can improve! Terms | Privacy'. Underneath, there is a section titled 'Choose a conversation style' with three buttons: 'More Creative' (highlighted in purple), 'More Balanced', and 'More Precise'. On the right side of the interface, there is a vertical sidebar with three buttons: 'Anal Create a', 'Writ Help me write a s sales pit', and 'Bus What's e New Yo'.

Copilot Chat About

Copilot 9:15 AM

Good morning Kat!

Here are some ideas that might help you get started:

- Catch up on a meeting you missed
- Summarize important documents to speed up review
- Quickly search your data for key information and timely answers

As your Copilot, I'm here to assist you but do make mistakes, so sources are provided for your review when possible.

Copilot PREVIEW

Help me build a report summarizing our workforce hiring for the last 12 months. I want it to include the following:

- How many employees we hired broken down by employment type
- An age breakdown of current employees
- The ability to filter by position type and role
- Other interesting breakdowns of hiring by employment type

Here's a new report page summarizing workforce hiring for the last 12 months. It includes key metrics for understanding your workforce demographics like diversity, average age and attrition rate. Remember to check for accuracy.

Education use cases

Opportunities for AI in Education

Operate more efficiently

Challenge ■ As costs goes up, institutions need to accomplish more while saving time and money. Meanwhile students and staff are overloaded and under resourced.

Solution ■ Automate time consuming tasks with Power Apps and AI

Benefits ■ Save time and money to reinvest in your mission and deliver better student experiences

Southern New Hampshire University | US

- Challenge** ■ The university had developed a variety of systems to manage the institution and deliver academic programs to its diverse student population. However, these systems had been built with different technologies and were maintained through different processes. Consequently, data was dispersed, and system access was inconsistent.
- Solution** ■ The SNHU team and Microsoft partner Innovative-e, successfully migrated its university-wide project management activities exclusively to Microsoft 365, making full use of Teams, Power Platform (Power Apps, Power Automate, and Power BI), and Project Online.
- Benefits** ■ Using tools like Power Platform, which enables simple drag-and-drop connectors with Power Automate, means vast time savings for organizations like SNHU.

We'd recently established Office 365 and Microsoft as the choice for the university. From there, the ease of access to other tools was seamless. Because of the Microsoft ties and what we were already launching internally, it just made it an extremely easy transition and a very easy implementation as well."

— Kurt Mithoefer
Assistant Vice President of Planning and Value Creation,
SNHU

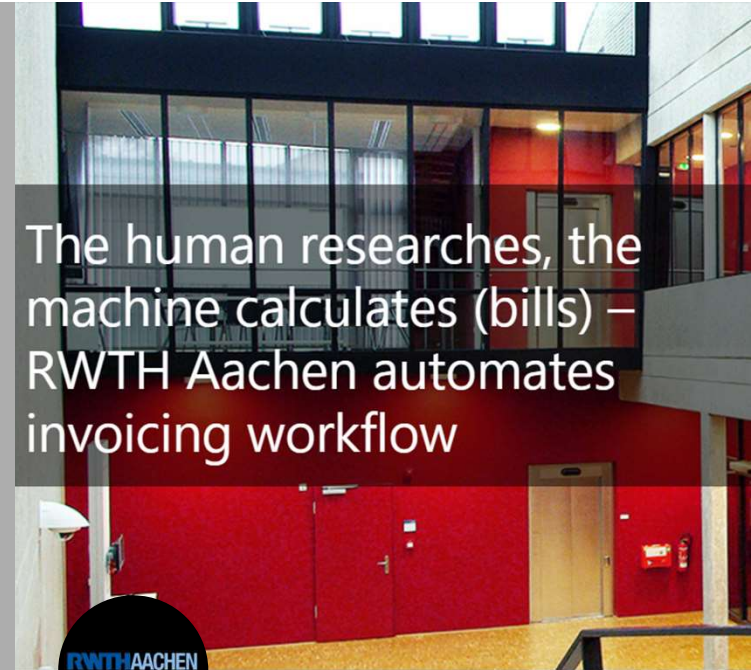

RWTH Aachen University Germany

Challenge ■ One invoice, many researchers. The university needed to direct invoices to where they would actually be paid.

Solution ■ An automated invoicing workflow for Microsoft Azure based on the cloud and on Dynamics 365 Business Central was ready for use after just three months. This has enabled the cloud to be rolled out for research projects all across campus.

Benefits ■ The new solution reduces administrative effort and saves time at the IT Center – time that can now be spent providing tailored advice on cloud-related matters.

The human researches, the machine calculates (bills) –
RWTH Aachen automates
invoicing workflow

Thanks to the automated invoicing workflow based on Microsoft Azure, invoicing now aligns with our internal processes. As a result, we can harness the full range of cloud technologies in all our research areas.”

– Denise Dittrich
Assistant Head of Systems and Operations
IT Center RWTH Aachen

Innovate at speed and scale

Challenge ■ Institutions are looking to harness the power of AI, but newer technical advances such as ChatGPT pose opportunities as well as risks

Solution ■ Transform processes and tasks with Azure Open AI

Benefits ■

- Drive fundamental research and operational breakthroughs
- Responsible use of AI
- Your data is not used to train the OpenAI foundational models without your permission

Yale School of Medicine US

Challenge ■ The Tietjen Lab at the Yale School of Medicine needed faster research processes and infrastructure to make the most of every organ donated.

Solution ■ The lab relies on Azure Functions to automate initial processes through event-driven serverless code. This allows for automatic processing of tissue data in a seamless and reliable fashion.

Benefits ■ With newfound efficiency, the lab can collaborate and make life saving decisions in real time, improving the viability of kidneys used in transplants and reducing organ waste.

We need partners that can help us build the infrastructure to go really fast so we can fully honor every donor organ. The partnership with Microsoft and Terawe has revolutionized our approach and our thinking."

– Dr. Greg Tietjen
Assistant Professor and Principal Investigator

New York City Public Schools US

Challenge ■ How to embrace the potential of generative AI to support students and teachers in a responsible, safe, innovative way.

Solution ■ As a first step, launched a chatbot that uses Microsoft AI technology to be the first point of contact with employees and families calling the IT Help Desk

Benefits ■ Faster, personalized support

We're thrilled to be working with Microsoft to develop a path forward and leverage AI tools to bring meaningful benefits to our schools. I'm encouraged by the initial success we're seeing and the opportunity we have to build on the enormous strides we've already taken with Azure."

– Zeeshan Anwar
Deputy Chief Information Officer of
New York City Public Schools

National Taiwan Normal University | Taiwan

Challenge ■ How to empower Taiwanese students to improve English-language speaking skills to excel in all areas of industry on a global level, using their Cool English English-language learning platform. NTNU needed something that could adjust its language based on each individual student's needs and English proficiencies.

Solution ■ Utilizing the Azure OpenAI Service advanced language model called Davinci and ChatGPT, NTNU built 10 educational "CoolE" bots for the Cool English platform, each with its own unique personality.

Benefits ■ The more realistic conversational practices foster more active learning, as opposed to passive methods like listening to movies or reading books in English.

Compared to other AI models that NTNU used previously, the Davinci model in Azure OpenAI Service produces significantly more inviting and approachable responses.

NTNU helps K-12 students master English faster with innovative learning platform powered by Azure OpenAI Service

By utilizing the advanced language models in Azure OpenAI Service, Cool English is taking an innovative step for English education in Taiwan, helping students reach their learning goals and overcome the challenges of limited opportunities for real-life conversational and writing practice.

– Dr. Hao-Jan Howard Chen
Professor, Department of English
National Taiwan Normal University
